

About the Authors

KEVIN A. BAUMERT is a senior associate in WRI's Climate, Energy and Pollution (CEP) program. His research focuses on the Kyoto Protocol and climate change policy instruments. Mr. Baumert's areas of expertise include international emissions trading, the Clean Development Mechanism, international investment law, public participation, climate policy in Central and Eastern Europe, and greenhouse gas emissions data. He was lead editor of *Building on the Kyoto Protocol: Options for Protecting the Climate*, published in 2002. Prior to joining WRI in 1998, he received a B.A. in Economics from the University of Notre Dame and a Masters degree from Columbia University's School of International and Public Affairs.

TIMOTHY HERZOG is an associate at the World Resources Institute working on domestic and international climate policy issues. He is one of the primary designers of the Climate Analysis Indicators Tools (CAIT), for which he focuses on the development of new data sets, technologies, and analytical approaches. He has contributed to several reports published by WRI and other leading climate policy centers. Prior to joining WRI in January, 2004, Herzog worked in the private sector as a technology consultant to several leading U.S. companies. Herzog holds a master's degree in public policy from the Georgetown Public Policy Institute and a bachelor's degree in communications from Bethel University in Minnesota.

JONATHAN PERSHING is Director of the Climate, Energy and Pollution Program at the World Resources Institute. He is active in work on domestic and international climate and energy policy, including emissions trading, energy technology and the evolving architecture of international climate agreements. Prior to his move to WRI, he served for five years as the Head of the Energy and Environment Division at the International Energy Agency in Paris. From 1990 to 1998, Dr. Pershing served in the US Department of State, where he was both Deputy Director and Science Advisor for the Office of Global Change. Dr. Pershing is the author of several books and numerous articles on climate change, energy, and environmental policy, has served as a Review Editor for the IPCC, and will be a lead author for the IPCC's 4th Assessment Report. He holds a doctorate in geology and geophysics from the University of Minnesota.
